## Access Controller

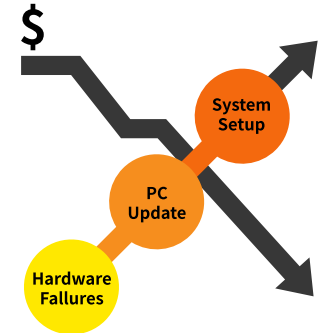

### Affordable, Scalable, Browser-Based Access Control

Sicunet web-based access control offering now provides solutions for installations of any size. Pro™ and Enterprise™ enables users to manage their system anywhere there's an Internet connection - with no dedicated PC costs. It also lets you pull reports easily to meet compliance requirements. With a browser-based interface, your learning curve and training time are significantly decreased. And you don't have to have a dedicated PC - simply log on and you're ready to go, securely - from the office or anywhere. Sicunet web-based access controller can be applied from small business operations to large corporate campuses. Our access controller integrates with our fully-featured CMS15 video management software to enable more robust and sophisticated Spider series integrations.

### The Sicunet Spider Series Advantage: Total Cost of Ownership (TCO)

- Browser-based access system is faster to setup, simpler to maintain
- Embedded Linux Operating System (O/S)
- Independent network, server, and dedicated workstation hardware are not required
- Includes SQL database engine; no add-on database software licenses required
- No client licenses to load
- Common hardware installation reduces hardware training and inventory cost

The Spider-Series browser-based access system saves time and money!
