

SMART VISION

Mobile Viewer

On-the-go access with a free mobile app (Android App / IOS App)

Users can access surveillance on-the-go with Sicunet Mobile Client, an application for viewing, playing back and exporting video. Sicunet Mobile Client works with all central management software(CMS15), and all security devices. Available as a free download from Google Play, the App Store and Windows Phone Store, the application gives instantaneous access to systems via Wi-Fi, 3G or 4G connections. Sicunet mobile monitoring solution delivers excellent remote video surveillance with your mobile phone while you are on the move. Just by a simple click, you can then view instant video wherever you are. Sicunet mobile monitoring solution makes your business visible over mobile phone. It is simple, flexible and convenient.

Features

- Free mobile application for on-the-go access video
- Remote access with simple function at hand
- Support all common smart mobile operating system: iOS, Android
- Instant access anywhere
