Secure out of network remote management of system

4 Door

Encrypted connection and data transfer. SSL,AES 256 and HTTPS

Corporate

- Browser Managed Does not require any additional software required
- Secure hyperlink allows for one click connection to system.
- All the data is managed and maintained at the edge.
- Customer all the software and is not required to pay a monthly fee.
- Cache the username and password for easy access..
- Technology manages the system locally via the cloud so if the cloud is off-line the system can still be managed locally!

See "FAQ for the IT Professional" for technical data for communications and outbound port configuration.
